

RGIMed Product Catalog

Authorized distributor of Paradigm Bracing Solutions. Orthopedic bracing across spinal, knee, and extremity care — with HCPCS information, product documentation, competitive acquisition cost and responsive account support.

Every account comes first.

Christina Rustin

President & Owner, RGI Enterprises, LLC

RGI Med is built on relationships that last — accountability when it matters, responsive service, and product quality that healthcare organizations can stand behind.

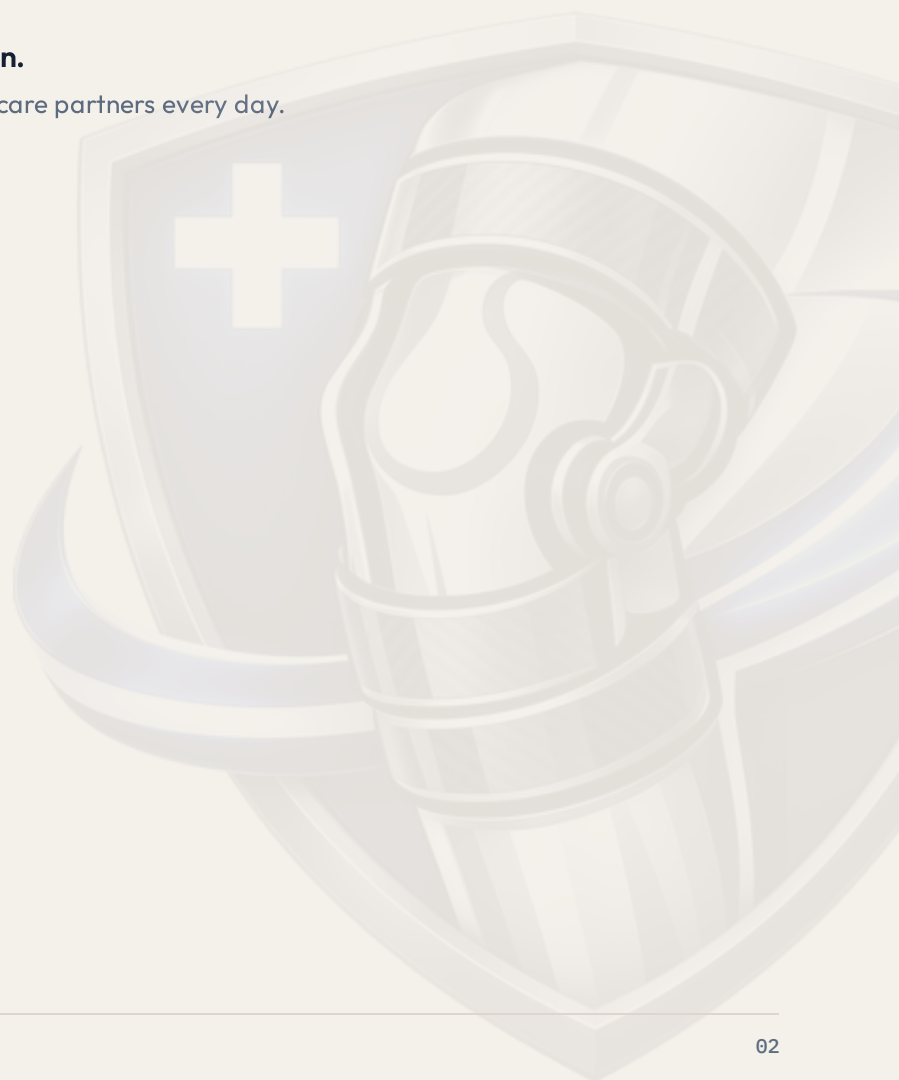

Partners should not have to choose between a brace they are proud to dispense and economics that work for the program. Our responsibility is to help you do both, with a long-term healthcare partnership rather than a transactional supply relationship.

“Our job is to make bracing easier for our healthcare partners, so their attention can stay where it belongs — on their patients.”

Christina Rustin · President & Owner, RGI Enterprises, LLC

Responsive. Accountable. Relationship-driven.

Those principles guide how RGI Med supports healthcare partners every day.

VALUE

Improve brace quality. Lower acquisition cost.

Paradigm bracing, HCPCS information, product documentation, competitive acquisition cost, and responsive account support — all from a team that knows your account.

01

Authorized Paradigm Distributor

RGI Med is an authorized distributor of Paradigm Bracing Solutions, providing organizations access to authentic products, current product information, and available documentation.

02

Product Breadth

Spinal, knee, and extremity bracing across a broad Paradigm portfolio — giving healthcare organizations multiple product configurations within one distributor relationship.

03

HCPCS & Documentation

Product-specific HCPCS information and available PDAC letters or fitting instructions help clinical, operational, and billing teams review product information efficiently.

04

Responsive Account Support

Product questions, pricing, ordering, and account needs are handled by a team that knows the relationship — not an anonymous ticket queue.

What healthcare buyers should expect from a bracing partner.

Orthopedic bracing decisions involve more than the product itself. Healthcare organizations may consider product quality, acquisition cost, documentation, portfolio breadth, and supplier responsiveness together when evaluating a bracing partner.

PRODUCT QUALITY

Construction, adjustability, fit, and ease of application matter at the point of care.

ACQUISITION COST

A sustainable bracing program requires product quality and cost structure to work together.

DOCUMENTATION

HCPCS information, fitting instructions, and available product documentation should be easy to access.

PORTFOLIO BREADTH

A broad product line can simplify supplier relationships across spinal, knee, and extremity categories.

RESPONSIVE SUPPORT

Healthcare organizations should know who to contact when they need product information, pricing, ordering assistance, or account support.

RGI Med is built around those priorities.

Clinical-grade bracing across spine, knee, and extremity care.

SPINAL

LSO, TLSO & cervical

LSO, TLSO & cervical solutions across Atlas, Frame, Helix, Prism, and Cortex.

KNEE

OA, ligament, ROM & post-op

OA, ligament, ROM, postoperative, and accessory options across Vector, Shift, Tempo, Proton, Reflex, and KS-97.

EXTREMITY

Shoulder to ankle

Shoulder, elbow, wrist, and ankle solutions across Matrix, Signal, Nano, and Pulsar Pro.

Spinal & cervical bracing.

Explore lumbar, thoracic, and cervical solutions with model-specific HCPCS information and product documentation.
